WHAT IS A LEPC?

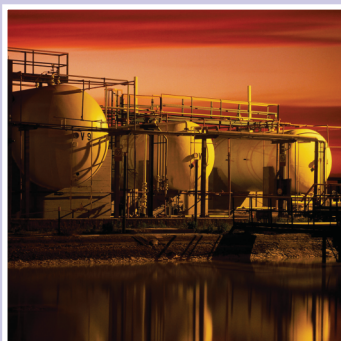

Local Emergency Planning Committees (LEPC's) were established by the Federal Emergency Planning and Community Right-to-Know Act, as Title III of the Superfund Amendments & Reauthorization Act of 1986. This legislation establishes requirements for federal, Tribal/State, local governments, and industry, regarding emergency planning and "community-right-to-know" reporting on hazardous and toxic chemicals.

In September 1989 the Fulton County Local Emergency Planning Committee (FCLEPC) was established by the Fulton County Board of Commissioners to pursue the development of an awareness program involving the community, industry, local governments and the media regarding hazardous materials.

The FCLEPC works to understand fire and chemical hazards in the community, look for ways to prevent chemical accidents and develop emergency plans in case of an accidental release.

MISSION

The mission of the Fulton County LEPC is to coordinate and promote comprehensive and consistent emergency response and preparedness through outreach and educational programs.

BUSINESSES

All private and public companies that exceed allowable thresholds of certain chemicals* must submit an Emergency and Hazardous Chemical Inventory Form to the Local Emergency Planning Committee (LEPC), the State Emergency Response Commission (SERC), and the local fire department annually.

Atlanta-Fulton County Emergency Management is the lead agency for Fulton County's Tier II Program. Tier II reporting is a required mandate from the State of Georgia Environmental Protection Division (www.gaepd.org) covered by the Emergency Planning and Community Right-to-Know Act (EPCRA) requirements.

Georgia requires all reporting to be electronic utilizing E-Plan. A single submission of Tier II information to E-Plan can satisfy the requirements for individual submissions to the SERC, LEPC, and local jurisdictional fire department.

To file your Tier II report, please visit: <https://erplan.net>. To contact the Tier II Program Manager or report a hazardous material release call (404) 730-5600.

*Please see the EPA List of Lists at: <http://www.gaepd.org/Documents/tier2.html> for chemical lists with thresholds.

COMMUNITIES

For more information about hazardous materials in your community, contact:
